Over. Nice DLC but the black mask is not included in the DLC.. Update:

Please Note that this Review was made when i was just a player and now that im a dev im simply updating this to state that i am now a dev but this was a review when i was just a player

Game is still be developed so please remember this while buying this

ive played this game and i love it so far the dev is only by him self and he could use more support for the future if he desides to make games and ill give a list of the stuff i like about the game

pros

base build

active dev

coop pve

cons

this game is only deved by one person

the game needs more content

and hits are somewhat unfair as they are not targeted. Holy♥♥♥♥♥they fixed it. I regret spending 30\$, I wouldn't recommend the purchase right now. Huge buzz kill when attempting to loot structures to have zombies appear of of thin air around you. You can walk though an empty room (or clear the building) turn around and have 1 or a cluster of enemies to deal with.

There needs to be a safe spot mechanic in place 20-50 blocks so you can just deal with whats around you and be able to loot in peace. Also when using the claim land block it be nice if there was a no spawn min radius so players wouldn't have a zombie hanging out at the front door or worse [yet...in the base. Hopefully this will covered in the next patch.. Another game that just shows why early access games shouldn't be bought.. A seemingly charming and fun game. this retro pixel adventure quickly](#)

grows stale and tiresome with its forced humor and extremely simplistic gameplay. I'm usually a fan of point-and-click adventures and I love silly humor, but this is just an endless stream of the same jokes repeated over and over (e.g. that the player characters is dumb) and bunch of pointless things to click on.

Could have worked if it had been shorter and had more of a gameplay hook. I think of this as a way less successful version fo McPixel.

You can add custom resources to this, ignore that other review.

VERY useful program, highly recommended! Very easy to use and there are already tons of 'parts' out there on the net to import for use here. If you liked the demo, this is just a more convenient shined up version of it.. Draw a line on a piece of paper, put the letter A at one end, and the letter B at the other. Make sure there is nothing interesting on the line between the two points. Now take a different coloured pen/pencil and slowly draw over the line from point A toward point B, as you do this recite various proverbs in a voice akin to reading a script at a school play.

This is what playing Drizzlepath: Genie is like.

I thought the previous Drizzlepath was pretty bad, but this one's just as dull and is three times longer! I like the idea of walking simulators, but they have to have something in them to keep you interested, whether it be landmarks, buildings, animals, fauna, whatever. The extent of "features" in this game are a few empty houses dotted around, a handful of broken statues and an out-of-place dragon flapping through the skies: All of which you can't interact with.

It's a shame the Soundtrack isn't available separately, it is literally the best thing about the game, the rest of it is as bland as you can imagine a game being. Don't waste your time.. 4:3 aspect ratio + inability to quit game + no spoken dialogue = Sub-par brawler for die-hard Usagi Yojimbo comic fans. Recommended because I am one of those. For the price it's not bad and you'll get your \$5 worth. It reminds me of Fist of Jesus in terms of modern gameplay and quality of game.. Wow, definitely one of the milestones of modern VR.. Hexodius isn't the worst example of this kind of game, but it's not compelling either. Especially not at full price. I got it on sale, but it's otherwise pretty skippable.. Good puzzles! Recommended if you like Myst-like games.. I like it. My only complaint so far is that the enemies can still shoot a projectile right after they die.. You can throw a bowling ball and hit the pins. Basically that is it, no entertainment value at all. I would like to see a good bowling game, but this looks really beta or even alpha at best. I guess this could have some potential to become something more and I dont want to be the bad guy giving thumbs down, so keep on developing. By the way, it is not a 250 GB storage requirement as the specs says, but merely 25 MB...
